DATABASES

RAOELIMAHEFA Charly

Software Developer & AI Solutions

Passionate Full Stack Web Developer with 4+ years of experience building high-performance, maintainable web applications in both remote and on-site environments. Proficient in Ruby on Rails, PHP (Yii/Laravel), and JavaScript (Vue.js, React, Stimulus.js). Known for clean code, attention to detail, and strong problem-solving skills across the full development lifecycle.

WORK EXPERIENCE

AI Transformation
Sept. 2025 — Present

Impact Production Group (IPG)

On-site · Mauritius

- Research, design and implementation of AI-powered solutions to address the company's operational challenges
- Built a digitalization system for import documentation (TrOCR, LayoutLM, Mistral AI via Ollama, Python, PostgreSQL), replacing legacy paper-based processes across relevant departments
- Proposed and implemented SEO optimization strategies for the company website
- Planned and published content across corporate social media channels

Full Stack Ruby on Rails Developer
Mar. 2024 — Mar. 2025

Top-Webgroup

Remote · Mauritius

- Built and optimized a SaaS platform using Ruby on Rails, Vue.js, Stimulus, Turbo, and MySQL
- Improved performance, debugged issues, and refactored legacy code
- Integrated new features and wrote unit tests with RSpec

Full Stack PHP / JavaScript Developer
Jun. 2022 — Feb. 2024

Open Atlas

Remote · Réunion Island, France

- Developed the Communecter platform using PHP (Yii), JavaScript/jQuery, and MongoDB
- Enhanced UI/UX and delivered new product features
- Performed debugging, refactoring, and performance optimization

Full Stack Node.js / React Developer
Jan. — Sept. 2021

Ny Ask

Ankadifotsy, Antananarivo, Madagascar

- Developed a logistics management platform (Node.js, React.js, PostgreSQL)
- Built a back-office system for managing inbound and outbound inventory
- Implemented a barcode scanning system for product tracking
